

## CARIM Annual Scientific Symposium

CARIM's 2007 Scientific Symposium will be held on Wednesday, November 28, 2007. The heart of the program is a poster session, in which scientists of the institute will present their recent research findings.

The lecture program in the morning includes a number of highlights of CARIM's present activities and future developments. The morning session will be concluded by the presentation of the PhD-student training certificates.

In the afternoon program we welcome Prof. Dr. S. Dimmeler, recently appointed to the Edmond Hustinx Chair 2007. The symposium will be concluded by the presentation of the CARIM Dissertation Award 2005-2006 and the Robert Reneman Lecture 2007. This lecture, in honor of the institute's founding scientific director, will be given by Jeffery D. Molkentin, M.D. Professor of Pediatrics, University of Cincinnati Children's Hospital Medical Center, USA. Professor Molkentin is renowned for his studies on the molecular basis of early and late cardiac disease.

We take great pleasure in inviting you to the CARIM Symposium 2007.

We kindly request you to return the attached application form by November 9, 2007.

M.J.A.P. Daemen, Scientific Director,  
Cardiovascular Research Institute Maastricht (CARIM).
